1. The first part of the paper is devoted to a
discussion of the general principles of the
theory of the subject. It is shown that the
theory is based on the assumption that the
subject is a function of the variables
which are subject to the conditions
of the problem. The theory is then
developed in a series of steps, each of
which is based on the previous one. The
theory is then applied to the problem
at hand, and the results are compared
with the experimental data. The theory
is then shown to be in good agreement
with the experimental data.
